18 - What were the most effective aspects of this course?	
Return Rate	11/15 (73.33%)
- Course was very well structured according to the needs of the students. I have learnt how to use Photoshop, premier, light room, equipments for recording and photo shooting which i think will be very useful for the rest of my course. - First time to have a media study course, and very positive experience, feel more free to discuss in class. - hands-on work - Learning many new skills - Organized and challenging class. - The classroom environment and standards set by each of the students. - The most effective aspects of the course were that Professor Wong truly has a deep understanding of Media Design, and finds ways to incorporate what you're interested in, into the learning within the course. Allowing us to work on things that interested us was very helpful. - The professor had the class laid out well. Each week built on the next in a progressive, sensible order, so it all worked well. - The professor was very hands on when teaching the course. It was very effective in my learning of the content. - the workshops - When he illustrates the topic we are about to do. He also add some creative ideas to make the class more entertaining and understanding.	

19 - What, if any, suggestions do you have for the course?	
Return Rate	7/15 (46.67%)
- be more critical in feedback, other than that - everything was great - I think course is very well designed particularly to the students who were new to Photoshop, sound and video editing, designing and Prof.Wong was very effective in explaining all this up to the mark. I really recommend all students to take this course to make their basic strong before moving further to the production courses. - I would love to have had this class twice a week instead of one long class. Therefore having more time to discuss the projects with the class before deadline. - improve students' skill by giving more time on practical practice in class - Possibly make it more of a lab class, where when being shown how to use photoshop we are all sitting working on a computer of our own as well, rather than just watching. I think it needs to be a little more hands on IN CLASS. - The professor should build in a few more minutes of actual demonstration of the technology being discussed. Just a heartbeat more. - The time in which it was taught is far too long, after two hours I lost concentration. Especially without an adequate break

20 - Please comment on your instructor's teaching effectiveness: Virgil Wong	
Return Rate	7/15 (46.67%)
- Clearly enthusiastic about the material, he knows it well, and inspires everyone to do good work. - Effective, however again. Too much information in one session - Great! He was very hands on and gave great constructive criticism. He was very knowledgeable about every topic in class. A great teacher! - knows how to talk with enthusiasm, very effective - Prof. Vigil Wong is a energetic and dynamic personality. He has a thorough command in his field and the course material were explained clearly. He is always well prepared for his class and gives the students a sense of the field, its past, present and future of the field. He definitely encourages independent thoughts and encourages the students very effectively in their work. If i had any doubts or need any suggestion related to course or outside, he was always there to help and guide. - Professor Wong was a great instructor and really knows what he is talking about. His knowledge on the subject shines through and his thoroughly organized modules really show how much thought he put into things. - Virgil Wong organized the course really well, I knew what I was suppose to do class-by-class from day 1. Challenging assignments. Awesome class!	

21 - Other Comments?	
Return Rate	2/15 (13.33%)
- More classes by this professor. - The projector in the classroom made things very blurry and difficult to see -- not helpful when we are watching someone show step by step within photoshop. Also some students were disrespectful to the professor and other students in the class by simply not paying attention or seeming to care. Their lack of effort on assignments and blatant disregard of class discussion was rude. There were a few times I wish the professor called them out on their actions in the moment. I'm certain he took note of these people and their actions, but a public acknowledgment would have made me feel better.
