18 - What were the most effective aspects of this course?

Return Rate	6/13 (46.15%)
• Mr. Wong's enthusiasm and passion shined through and motivated me in ways I didn't imagine coming in to this course. The classes were challenging and well structured with excellent feedback and support from both Virgil and Paola the TA. • The course covered many aspects of media design and is a well designed intro class to prepare students for all sorts of challenge. • The professor • The course provided a very effective introduction to the basics of photography, film production, post production, and web design. The progression of the course was fluid. The in class discussions were helpful and informative to better our design work in the future. • --Project based learning --In-class time to practice/see new programs and equipment in action --enthusiastic instruction --facilitated feedback sessions --exposure to new ideas, applications, creations • I liked having discussions with the class and seeing other people's work - it made it very collaborative and gave me ideas I would've otherwise not have had.	

19 - What, if any, suggestions do you have for the course?

Return Rate	7/13 (53.85%)
• It was perfectly executed from the teachers side. • I wish we could have spent more time learning new things and cut down a little time on reviewing everyone's work in class. As rewarding as that is, some aspects are more challenging for me and I'd wish to be able to spend more time learning and practicing a little bit in class so that I can make more out of the assignment experience. • Uh, you definitely need to be squeezing less things into a semester, there's no way people are going to be learning effectively every single aspect of design/photoshop/shooting/premiere/dreamweaver/etc Also, 7-10pm and three hours is no. • For some of the subjects, it would have been helpful to have more time to do in-class work. Eg. spending more time on html and less time on crits. • It may be better to have the class discussions later in the class. The class runs for three hours, so the new class subject at the end gets less attention. • --More time for instruction --while learning a new program or piece of equipment, everyone should be doing it simultaneously,perhaps computer lab setting would be helpful • Sometimes I felt like we spent a bit too much time talking about our assignments and not enough time on certain Adobe programs, which made it hard for me to try and do on my own at home.	

20 - Please comment on your instructor's teaching effectiveness:

Return Rate	7/13 (53.85%)
• I came in to this class with no experience what so ever in any of the practices taught in this course. Because of Virgil's energy and passion for the craft, I have surfaced from this course not only enlightened and inspired, but also capable in every aspect taught. • Virgil is very responsible and caters to the students. The class is super organized and everything is so easy and clear to find. • he did the best he could with the time constraints! virgil is great • Virgil Wong is a great teacher, I really enjoyed this class! • Very effective. Instructor takes time to show the objectives and encourages creativity. Very helpful and responsive out of class for issues that arise on assignments. The basic understanding of equipment and objectives are clear. • --Helpful --positive --customized --supportive --met people at their level • Very effective, enthusiastic, and approachable! Very good class overall.	

21 - Other Comments?

Return Rate	2/13 (15.38%)
• Thank you for an excellent experience and a truly satisfying semester. • n/a
