18 - What were the most effective aspects of this course?

Response Rate	9/14 (64.29%)
- The most effective aspects was his enthusiasm about the topics and also his willingness to help with whatever issue we were having. - Creative criticism played in an effective way to encourage everyone in class to make changes or to pursue some of the interesting ideas and concepts. - Well-rounded syllabus that gave a foundation of skills in many types of media production. Feedback from the professor and fellow students during class time was helpful. - I really appreciated every aspect of this course. You were given just enough information in class, and then given the opportunity to execute for yourself, which I truly enjoyed. - Presenting and in-class critiques. Having some assignments be to improve upon the prior week's work. - The projects and tools we used in class. - Attempting new concepts & technologies which I had never tried before. Thanks to the professor, the grasping was extremely easy & was an enriching learning experience. - It was very well presented - I thought the feedback was good.	

19 - What, if any, suggestions do you have for the course?

Response Rate	7/14 (50%)
- No suggestions. You're doing a good job. - A few more classes on the HTML and also on Adobe would be nice. - Although a helpful and crucial part of class time, the review and commenting on each classmate's work could run excessive. This gave the instructor less time to teach new material and explain upcoming assignments. I also wish we would have gone more in-depth with the production skills instead of learning the absolute basics, but I suppose the absolute basics is the point of the course. - As someone who had limited working knowledge of videography, (editing) and sound editing I would have liked to have more hands-on learning from the instructor. The same goes for the Photoshop portion of the class. I am someone who learns a lot easier hands-on, then reading how it's done, especially for topics that are creatively focused. - None that I can think of right now. - It is a great course and gives students a taste of new mediums and design tools, however for someone with zero experience with these tools, a week sometimes felt way too short to grasp the concepts (specifically the HTML work). - I think more learning and less critiquing of everyone's work.	

20 - Please comment on your instructor's teaching effectiveness:

Virgil Wong	
Response Rate	9/14 (64.29%)
- Thank you so much for making this class fun and interesting. - Very effective. Friendly and very helpful. - I loved professor Wong's way of teaching and he's a cool individual! I would definitely take another class with him. - Professor Wong was prepared, helpful and gave productive feedback for the most part. The assignments were laid out to be effective in developing design skills. - Professor Wong was really effective! I like the fact that he works in the field that he is teaching. He is extremely knowledgeable and is probably the main reason why I am moving towards more of a creative approach in my Masters program. He kept me engaged the entire 3 hours each class and I was often eager to tackle each assignment. - Professor Wong did a good job of teaching all of the topics that the course covers. Sometimes class instruction was rushed and I felt like some of the tips and tricks for computer programs were missed. I wish some more time was spent with showing the class key steps in programs we will continue to use, like in Photoshop, especially after we got the hang of the program. The Professor also kept a good pace to the course and each class. - Very engaging and passionate professor. Very knowledgeable and has a good teaching style. He always took the time to provide feedback to each student which was helpful. - Absolutely effective, on-point & so real. It was as if we actually learned from a real person as opposed to a mundane professor. This gave the coursework so much character & classes so energetic & attracting, that I always looked forward to the next class the moment I stepped out of it. - I would like to learn more hands-on knowledge.

21 - Other Comments?

Response Rate	5/14 (35.71%)
---------------	---------------

- You're the real MVP. Thank you again.
- It was a great class. There is very little I would want to change about it
- I wish the professor was more critical of student's work. It seemed he may have been concerned with not offending anyone by being too critical. It's hard to make adjustments and learn from classmate's mistakes if everyone is only saying "good job."
- No additional comments.
- I really enjoyed this course and learnt a lot.
